### DETAILED ACTION

1. Applicant's arguments and amendments of 9-12-2005 have been fully and carefully considered. The examiner acknowledges cancellation of claims 3, 7-9, 17, 19 and 22 and amendment of claims 1, 18, 25 and 26. A new ground of rejection follows however, applicant is advised that the amendments made to the claims necessitate the new ground of rejection, namely because applicant amended claims wherein the target food items is milkshake, smoothie, fondue or sorbet and that the addition of water is at or below room temperature and there is not heating to the food formulation.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 10, 11, 13, 16, 18, 23 and 25- 26 rejected under 35 U.S.C. 102(b) as being anticipated by Sabatura.

Sabatura teaches a nutritional system comprising a base mix and flavoring which can be made by the addition of water or cold ingredients. A dip, a milkshake, a beverage or frozen dessert. [Note Column 10, line 12, line 20 and line 31]. By reconstituting the base mix and flavoring, with out heat the mix and flavoring produce a beverage, a milkshake, and dip. The dip as claimed is functionally equivalent to applicant's recitation of fondue. The composition of Sabatura fully anticipates applicant's claims.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 4-6, 12, 14-15, 20-21 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sabatura.

Sabatura teaches the invention substantially as claimed. Specifically, Sabatura teaches a versatile nutritional composition, which includes a base mix, and a flavoring, which can be reconstituted to make milkshakes, dips, frozen desserts, frozen ice cream, puddings, sauces and soups. The base mix and flavoring mix is reconstituted in using cold water and requires no heat in preparing the shake or dip or frozen dessert.

However, Sabatura does not teach including materials for dipping, toppings or "add-in" ingredients. Sabatura teaches including a flavoring mix, which can broadly include items such as sugar sprinkles or toppings. Sabatura teaches that the nutritional composition, which is reconstituted by the addition of cold water, is used in the preparation of dips. Generally, when one provides a dip, ingredients are provided to

Art Unit: 1764

"dip" into the fondue or spread. To include items for dipping or toppings would have been obvious expedients to one having ordinary skill in the art and the addition of these dipping ingredients would not impart patentability to the composition or food formulation as claimed. It is maintained that Sabatura teaches applicant's invention as a whole obvious.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fox et al. and Hunt et al. teach making milk shakes or cold beverages by reconstituting a cold-water starch-containing base with water.
